

Adding transitions and style to your movie is an important part of completing a project. In AutoMovie, there are different styles from which you can choose. Each one gives a different look and feel to your finished movie.

Step-by-Step Directions

Selecting an AutoMovie Style

1. Click **Tools** on the Menu bar.
2. Select **AutoMovie...**
3. The AutoMovie wizard appears.
4. Select an AutoMovie editing style from the box.
5. Click *Done, edit movie*.

AutoMovie Styles

The following AutoMovie editing styles should be considered for the movie:

1. **Highlights Movie**—This movie style has cuts and fades between clips, a title at the beginning, and credits at the end.
2. **Music Video**—This style adds quick edits for a fast pace and long edits for slower clips based on the music track's beat.
3. **Sports Highlights**—This style adds excitement to the movie with exploding titles and credits that wrap around the movie. It includes fast pans and zooms between clips.
